Description of work:		

It is acknowledged that work at heights risks will be encountered in the undertaking of routine maintenance at the above named centre. We confirm that we will manage the work at height risks associated with our work through:

- Providing competently trained personnel experienced in working at height;
- Completing and working to Safe Work Method Statements for tasks;
- Providing and using all required safety equipment which is currently tested/inspected; and
- Ensuring all personnel complete contractor management requirements including induction.

Furthermore, we confirm that we have read and acknowledge the site-specific work at height equipment present at the above named location, as detailed in the following document:
